Expo

Professional Experience

React Native Developer

Jun 2023 – present |
Victoria, Australia

I am working as a React Native Developer alongside my brother. This android app is called **"Destination Australia"** [↗](#). **More about this app.** [↗](#)

Frontend Web Developer

Oct 2023 – Jan 2024 |
Kathmandu, Nepal

I have worked as a full-time frontend web developer in Native Plug along with my fellow Developer friends. The project that I worked on was ***"Hostel Management Platform"*** [↗](#)

Interests

Coding, Designing, Travelling, Content Writing, Making Videos, Building PCs ...

Certificates

- High School Certificate [↗](#)
- SEE certificate [↗](#)

Projects

Single Page Portfolio Website

I have developed a basic format for my Portfolio Website with HTML, CSS, and JavaScript only (no libraries or frameworks used) during my learning phase. **Check that out here.** [↗](#)

PS: *This website is not responsive you might need to zoom if you are using a desktop browser.*

Another Website for myself

During my learning phase, I also developed this website completely with HTML, CSS, and JavaScript. One added feature is Website Responsiveness using media queries. **Check that out here.** [↗](#)

Sliding login/signup form

This is yet another cool form component I developed during the same time. **Check it out.** [↗](#)
Idea taken from Florin Pop.

Hostel Management Website

We (a group of four friends) built a full-fledged website for hostel management intending to help students from all over Nepal find hostels easily in a single place.

Destination Australia

With the increasing rate of people going for foreign employment to Australia, My brother and I created a website called Destination Australia [↗](#) hoping to help people in Australia and those who are planning for Australia.

MERN and Next.js projects

Check them out on my github. [↗](#)

Working on more projects...
